HERTY GERTY TUBULAR KEY MACHINE

A1HG-1

731⁵⁰

Duplicate tubular keys without having to make a large investment. Extremely easy to operate: Decode the original key with the supplied decoder and place the blank on the index hub. Dial the desired cut-depth, turn the hand crank, and you've made your tubular key. In just seconds, this extraordinary equipment will cut #137 tubular keys — Ace standard, small (137S), large(137A, UL), offset right and left; in addition to Gem, Taylor, and others with spacing anywhere from 0° to 360°
 Supplied complete with decoder, special high speed steel cutters and complete instructions in a convenient wooden case.

EJECTOR PUNCHES

TBIP 

TBMP 

Two tools for ejecting IC cores.

TBIP - Originally designed for use with THE BLOCK, this punch is suitable for most any I/C core.

TBMP - Use this time saving 4 pronged punch to eject cores. Suitable for manual use and with A-1's service equipment. Ejects cores with two hits instead of 6 or 7.

35⁰⁰

COMPLETE SERVICE KIT FOR I/CORE

Includes A1 tools

- TB1** Decoding Block
- TB2** Multi-Use Capping Block
- TB3** Dumping Block

AIICKT
399⁰⁰

If purchased separately, a combined price of 427.70.

Buy as a kit and save 32.70

PLUG SPINNER

AI26
65⁹⁰

This tool is a must when it's easier to pick a lock backwards instead of in the right direction. With the lock picked in the direction, simply wind the spinner in the proper direction, set the trigger, insert the blade into the plug and then release the trigger. The plug is now picked in the right direction.

THE BLOCK

An interchangeable core hold fixture, designed to service Best/Falcon type systems with a maximum of seven pins.

It's easy-to-use; just drive the pin stacks into the Block where the pin tray area keeps them separated. Works better than shimming or hand disassembly because, when opened, all pin stacks are accessible yet secure. Made of anodized aircraft alloy.

AITB1
165⁹⁰

CAPPING BLOCK

AITB2
163⁹⁰

Designed to save you space, time and money, TB2 is more than just a capping block. It is a versatile and compact workstation for interchangeable cores that's like having two capping blocks in one unit. Made with hard anodized aircraft alloy and heat-treated steel, it comes with two different tops which allows it to cap Best, Eagle, Arrow and Falcon cores.

DUMPING BLOCK

AITB3
99⁹⁰

Dumps and holds pins and springs from dozens of cores made by Best, Eagle, Arrow and Falcon. Using the standard ejector pin (included), simply drive the pin stacks into the lower compartment until they are ready to be disposed.
 Hardcoat anodized aluminum construction.

DUO BLOCK

Can be used for both .140 and .150 spacing. Ideal for capping Best® type cylinders and KABA Peaks® Caps both standard and spring (slide covered) I/cores.

AITB4
145⁰⁰

CORBIN RUSSWIN IC SERVICE BLOCK

The first multipurpose fixture for servicing Corbin/Ruswin interchangeable core.

- Control lug can swing out for pinning or checking of the control shear line
- Holds core secure for the safe staking or removal of the spring cover
- Allows for pinning of both 6 & 7 pin cores
- Durable anodized aircraft alloy

Quickly and Accurately

A152
8⁵⁰

ADJUSTABLE TENSION WRENCH

Appropriate for use on auto locks with spring-loaded dust covers. Designed for picking double-bitted locks (Schlage wafer, Chicago, Junkunc), but also works well with pin-tumbler locks, even the Yale #8. Spring steel fingers adjust from 5/16" to 5/8" and are held at the desired width by an adjustable collar.

A124
41⁹⁰

CAPSAVER™ PRESS FOR INTERCHANGEABLE CORE

The most time consuming task of capping cores is placing the small caps onto each chamber of the core. With the CapSaver™ Press, A-1's exclusive CapSaver™ strips will replace traditional caps. The CapSaver™ press actually punches and forms the caps as it seats them into the core.

Users will realize a considerable amount of direct savings in both time and materials. Actual tests demonstrate that 30 seconds is saved just in the time spent loading the 6 or 7 caps before staking them.

Each CapSaver™ strip is designed to cap four 6 or 7 pin cores and costs users about half as much as the caps produced by a leading manufacturer (suggested dealer price).

AICAP-5 CapSaver™ Press for I/Core
AICS-50 CapSaver™ Strips - 50 count
AICS-250 CapSaver™ Strips - 250 count
