

SLIDEGUARD

Locks for Doors and Windows

SlideGUARD products are proven security locks and have been for over 15 years. This lock is ideal for windows and doors that slide. SlideGUARDS are made for wood, metal, plastic and glass applications. In most cases, except for wood, it bonds to the material with a bonding adhesive that has a strength equivalent to 6,000 lbs. The installation takes about 60 seconds; the lock reaches its full strength in about 1 hour. The lock is made of stainless steel. There are 12 different keyed like numbers. No tools are required to install this lock.

Showcase Locks

These locks are unique. They have a bent Zee-type lip that extends over the secondary glass or door. This extended lip stops the chance of an intruder to by-pass the lock where the two pieces of glass meet. The lock plate is bonded to one side of the glass with the equivalent of 6,000 lbs. strength. Applications for this lock can be for showcases, credenzas, medical cabinets, stereo cabinets and more. The installation requires no tools and takes less than 90 seconds to install.

PATIOGUARD

Patio Lock (NDS)

NDS provides a hook lock and a deadlocking feature for sliding doors. The latch is designed to hold the locking device so that it can not be lifted out of place. Available in three finishes, white (WT), brown (10B) and silver (32D). This lock is ideal for replacing the old "AGE" lock or similar type of locks. Most popular usages are for sliding doors that need outside keys, such as town homes, mobile homes, camper shells or tops and even swinging doors or screen doors. Available in either keyed alike sets or keyed different. The strike can be mounted two ways.

Handle Sets (NDS)

Patio Doors and Front Doors can be Keyed alike

This NDS lock has a handle on the outside to accept either Schlage or Weiser keys. Finishes are available in brown, silver and white. This can be a re-placement for a broken handle. The doors can be up to two inches in thickness for this lock. This is a very universal lock.
